

**NAME**

flow – flow control

**DESCRIPTION**

A *statement\_block* is either a *statement* or

```
{ statement; statement; ... }
```

**Conditionals**

```
if (condition) statement_block
```

```
if (condition) statement_block else statement_block
```

**Loops**

```
while (condition) statement_block
```

```
for (start; condition; increment) statement_block
```

**Branching within loop *statement\_blocks*:**

```
continue
```

```
break
```

**To jump back to the command level (usually on errors):**

```
exit
```
