

NAME

less – file perusal program

SYNOPSIS

```
less file_name [file_name ...]
```

DESCRIPTION

The *less* macro runs the handy file-perusal utility program of the same name in a sub-shell.

The program *less* is public domain software available through *usenet* or by request from Certified Scientific Software. Help for *less* is available while it is running by typing **h**, **H** or **z**, depending on the version.

DEFINITION

```
def less 'unix("less $*")'
```

EXAMPLE

```
less datafile
```

SEE ALSO

```
u cat vi ned
```
